Reduction of sediment pollution from residential properties is one of the major challenges facing the restoration of Chesapeake Bay. The Shoreline Evaluation Program (SEP) was established to help address this challenge. The program is designed to help shorefront homeowners improve the protection of their property in ways that also reduce sediment runoff into their nearshore waters. Using know-how from the Virginia Institute for Marine Science and the Virginia Cooperative Extension, SEP volunteers provide an on-site evaluation of property protection from both seawater and stormwater. Following the site visit, a written report is prepared with specific shorefront protection recommendations. Included with the report is a copy of the SEP Homeowner's Shorefront Management Guide which contains extensive shorefront protection and landscape information.

To register, please complete this form and the questionnaire and mail them to the address below together with a check for \$60 made payable to NNMG. The fee covers the costs of the evaluation materials, printing and postage. Any excess is used in the SEP educational and communications programs.
